Allowance

1. Claims 1-5, 9, 13-16, 18, 20-24, 28 and 32-37 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The allowed claims require an initiating party inserting a voice conference identifier in an e-mail message to a recipient party at a recipient node. The allowed claims also require transmitting the e-mail message to the recipient part at the recipient node. The closest prior art of record, Salmon et al, U.S. Patent No. 6,563,914 (hereinafter Salmon) fails to teach sending the conference identifiers (see Figure 4) in an e-mail message from an initiating party to a recipient party. Unlike Applicant's invention, Salmon does not provide a feature where the recipient party (Person2 or Person3 from Figure 4) can initiate the conference call. According to Salmon, "When the user (the initiating party) is ready to contact the next participant (recipient party), the user (initiating party) selects the icon corresponding to the next participant (recipient party) to be contacted. By selecting the icon, a request to dial the next participant (recipient party) is sent from the WWW browser to the WWW server" (see column 5, lines 20-35). Because the user (initiating party) of Salmon maintains

total control over the conference initiation process, Salmon teaches away from sending the conference identifiers (see Figure 4) in an e-mail message from an initiating party to a recipient party.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
